

GRIP-PAK™: TRUSTED MULTIPACK SOLUTION FOR CANNED BEVERAGES

Grip-Pak™ low density polyethylene (LDPE) rings from Roberts PolyPro check all the boxes:

✓ Sustainable

Grip-Pak™ ring carriers are certified as 100% biodegradable. We partnered with an independent agency to conduct testing in controlled laboratory conditions that mimicked an urban landfill environment. Over the course of 28 weeks, Grip-Pak rings biodegraded completely without the presence of false-positives or false-negatives. We make it easy to go green; rings are easily discarded with peace-of-mind.

✓ Durable & Reliable

From application to transport to the final sale, our plastic rings are lightweight but strong and keep your beverages secure.

Our plastic rings' eco-friendliness certification does not come at the expense of quality and durability. Grip-Pak™ plastic ring carriers are crafted to keep beverages secure from the time they're applied to when they're enjoyed by the consumer.

✓ Cost-effective

Looking for a cost-effective solution? Grip-Pak™ is the answer.

Averaging only \$0.05 per unit, these proven LDPE rings have been the go-to choice for multipacking canned beverages for over 30 years.

✓ Scalable

From low-production volume or low-speed operations to large regional, national, or multinational brands, Grip-Pak™ is an excellent choice.

Grip-Pak™ plastic rings are available in standard reels of 1,000 up to 4,300 and larger custom reels and packaging. Our GPA70 and GPA1000 applicators run at speeds of up to 70 and 1,000 cans per minute, respectively, and can be easily programmed for 2-, 4-, 6-, or 8-pack standard-sized cans.

READY TO GO GREEN?

Ideal for craft breweries, co-packers, and large beverage manufacturers, the Grip-Pak™ product line is a biodegradable, scalable solution that can help you improve output and efficiency. To learn more about Grip-Pak, scan this QR code.
